Find out what's happening next week

Week 12: Antarctica Discovery Week with RRS Discovery and Discovery Point Dundee.

Week 13: CSI Week with University of Dundee, Leverhulme Research Centre for Forensic Sciences.

01 July 2020: Dundee Science Centre's 20th Birthday. Join us and celebrate our birthday week

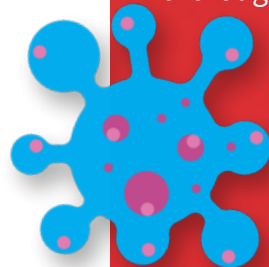

If you have any questions, please get in touch through our social media or email staff@dundeesciencecentre.org.uk

Home Learning Programme

Interactive activities for independent learning at home! Visit dundeesciencecentre.org.uk

We are in the twelfth week of our Home Learning Programme, if you've joined us for our Home Learning Programme until now, we want to thank you for joining in our activities with us, we thoroughly hope that this has been a useful resource for you and that we have inspired science at home!

Last week we had a really exciting partnership with the University of Dundee, School of Life Sciences, who took over our Home Learning Programme to help us uncover the world of microbes.

This week we will be discovering the continent of Antarctica. The RRS Discovery's first mission was to this home of the penguins. We are spending this week finding out lots about this icy desert and we are lucky enough to be joined by our friends at Discovery Point to bring some activities and information about Captain Scott and his amazing expeditions.

Our final week before our Summer break will be another amazing partnership with the Leverhulme Research Centre for Forensic Science from the University of Dundee. Over the week, you will get a chance to solve a case by looking at clues from the evidence we collect through the activities.

Don't forget our Home Learning Programme is open to everyone, all topics once uploaded, will remain on our website for you to check back on and complete at your own pace. Our Competition of the Week is still taking place, so be sure to send in your entries to be in with a chance to win a prize bundle.

HOME KIT

www.dundeesciencecentre.org.uk

We recognise there's a real need within our local community, for children and families to keep having fun and take part in science at home, we hope to make a positive difference to wellbeing and learning.

Working with the Gate Church, we are making activity kits based on our Digital Home Learning Programme to go out to the most at risk local families and children.
