

Keyhole Surgery Skills

Keyhole -- or laparoscopic -- surgery is a highly-skilled style of surgery that was pioneered here in Dundee. Create your own keyhole surgery game to test your skills!

You Will Need:

- A box (about the size of a shoebox)
- Various spoons, small bowls, chopsticks, etc.
- Small sweets
- Scissors

Instructions:

1. **With an adult's help**, using your scissors, poke a few holes in the sides of your box big enough to fit a spoon handle through.
2. Slide various utensils (spoons, forks, chopsticks etc.) into the holes and see where they end in the box.
3. Add various sweets in one end of the box and a small bowl (or just an area taped off to one side of the box) at the other end.
4. Using only the utensils in the holes, try to move your sweets from one side to the other (or from the floor of the box into the bowl). Time yourself to see how quickly you can complete the task!
5. **CHALLENGE:** Place puzzle pieces in the bottom of the box and try to put the puzzle together. The possibilities are endless! Set up a competition with your family! Who is the fastest? Who makes the least amount of mistakes?
