

# Make Your Very Own Sun Catcher!

## What do I need

- ★ Used plastic such as bottles or berry packaging
- ★ scissors
- ★ string or thread
- ★ hole punch
- ★ To add colour to the sun catchers you can use lots of different materials including: Sharpies, nail polish, paint or bright tissue paper (you will also need glue if using tissue paper)

## What do I do

1. Collect plastic and make sure it is clean.
  
2. With an adults help cut out different shapes. If there are any sharp edges these can be filed down with an emery board.
  
3. Colour and draw on the plastic. Some ideas are the planet, endangered animals and plants!
