

Make Your Own Flying Insect

What Do I Need?

1. Kitchen roll or toilet roll insides.
2. Coloured paper or paint.
3. Sellotape and Glue.
4. Googly eyes.
5. An old plastic document folder.
6. Cardboard for legs.

What Do I Do?

1. Squash down one side of your cardboard tube to make a shape of a head
2. Cover your tube with coloured paper depending on the insect you are making
3. Decorate your insect with eyes - googly or drawn on
4. Make the wings out of the plastic document folder
5. Decorate your wings with glitter pens if you have them
6. Make legs out of cardboard and stick them on the underside of your insect
7. Glue the wings on the top
8. Add feelers if you need them

We made a Bumble Bee, a Dragon Fly, a Ladybird and a Fly.

Send us photos of your insects!
