

Orbit Model

Find out how the Moon orbits the Earth, and the Earth orbits the Sun in this fun craft!

You Will Need:

- Scissors
- 3 paper fasteners
- Colouring utensils
- This sheet

Instructions:

- Colour in the Sun, Moon, and Earth. Then cut them out on the dotted lines and cut the two strips out.
- Push a paper fastener through the centre of the Moon and then through the end of the shorter strip and split the sides of the fastener to keep it in place.
- Push a paper fastener through the centre of the Earth, then through the other end of the shorter strip, and finally, through one end of the long strip. Split the sides of the fastener to keep in place.
- Push a paper fastener through the centre of the Sun and then through the other end of the long strip. Split the sides again.
- Now, your Moon should revolve around your Earth, and your Earth revolves around the Sun!
