

# Make Your Own Bird Bath

## What you need

shallow dish, a mixture of large and small stones, some gravel if possible, a jug of water

## What you do

★ Start by putting the larger stones in the dish, try to make sure the large stone is level or just above the height of the dish - this is for the wee birds to stand on who don't want to get their feet wet.

★ Next add in the medium stones - space them out so you can add the gravel around and in-between.

★ Finally add the water to around half way up the large stone.

★ Then sit back and wait for the birds to pop by for a refreshing wash.
