

STEM INSPIRATION AWARD

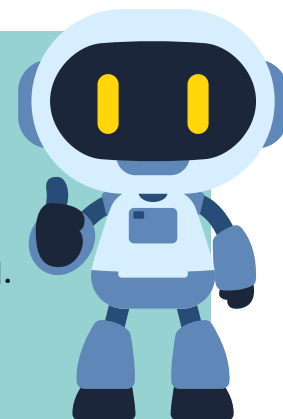

Take part in our STEM-tastic schools competition as part of Dundee Science Festival 2026!

We are inviting school children from across Dundee to work individually to create a poster on:

What will artificial intelligence (AI) look like in 25 years?

AI (artificial intelligence) is a big thing right now, and it's changing our lives in lots of different ways. Thinking about the future, what things do you think AI will be able to do to help humans tackle some big challenges like climate change, human health or farming.

In your design, identify a problem and a way that AI can help solve it. Good Luck!

School Name: _____

Please also write your name and age on the back!

Pupil/s name/s:

Year group/s:
